# Step by Step Guide

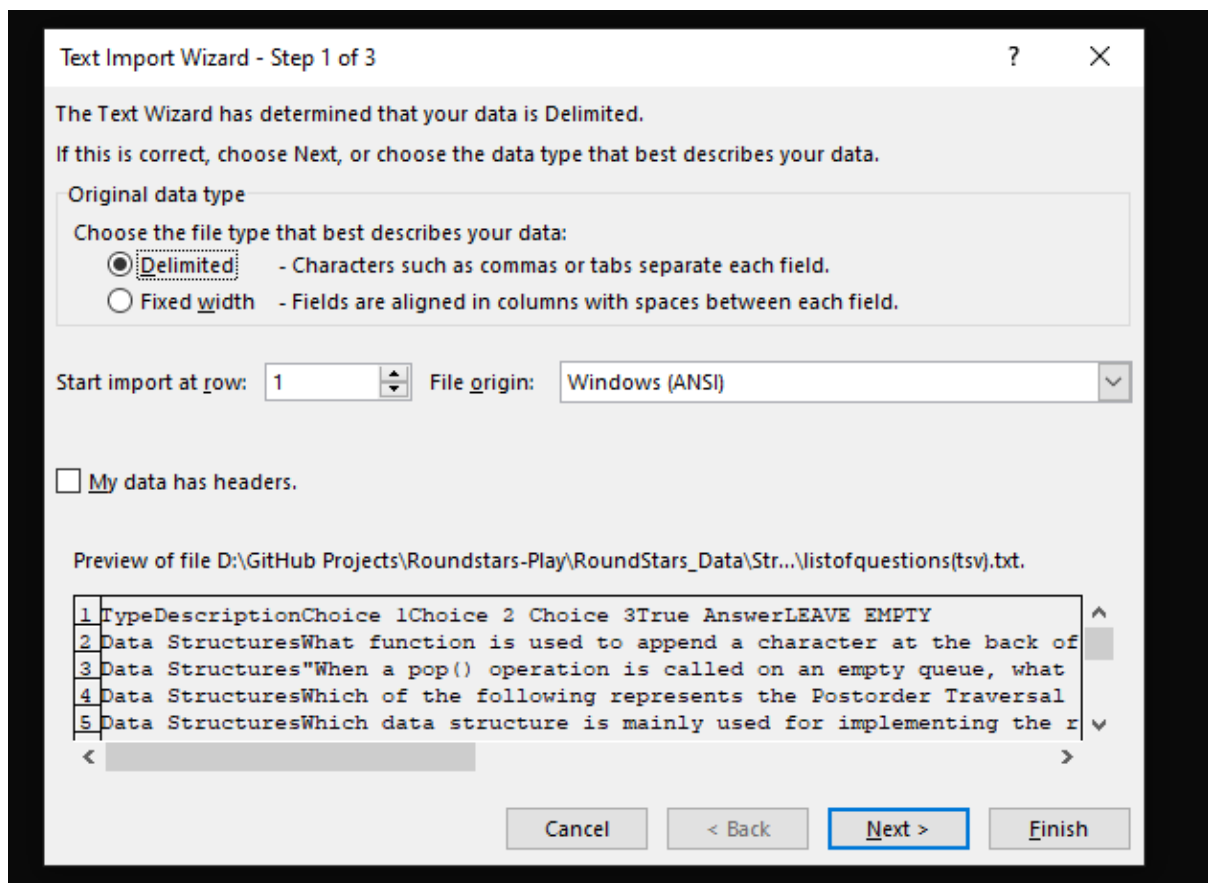

## Using Microsoft Excel

### Adding Data

First and foremost, find the file “StreamingAssets”, located under “Roundstars-Play > Roundstars\_Data”. There’s a few files but what we want to use is only “listofquestions(tsv).txt”

Next, Open your excel app and drag “listofquestions(tsv).txt” into the excel.

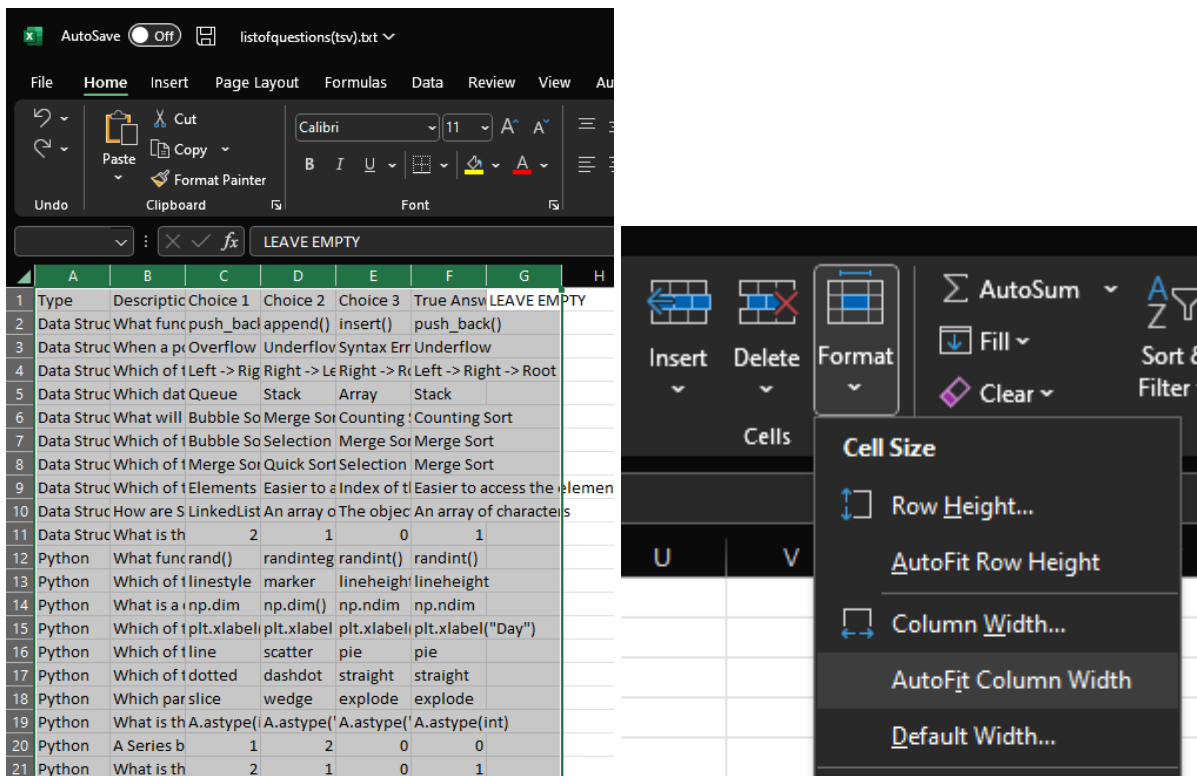

If this window appears, make sure “delimited” is checked and simply press “Finish”.

ListofQuestions[tsv]						
Type	Descriptive	Choice 1	Choice 2	Choice 3	True-False	LEAVE EMPTY
1	Data Struc	What func push, back append()	insert()	push, back()		
2	Data Struc	When a pi Overflow	Underflow	Syntax Err	Underflow	
3	Data Struc	Which of l Left -> Rig Right -> Le Right -> Ri Left -> Right -> Root				
4	Data Struc	Which data Queue	Stack	Array	Stack	
5	Data Struc	What will Bubble Sort Merge Sort Counting Sort				
6	Data Struc	Which of l Bubble Sort Selection Merge Sort Merge Sort				
7	Data Struc	Which of l Merge Sort Quick Sort Selection Merge Sort				
8	Data Struc	Which of l Elements	Easier to l Index of l	Easier to access the elements in an array		
9	Data Struc	How are l Linked List	An array o The object	An array of characters		
10	Data Struc	What is th	2	1	0	1
11	Python	What func rand()	randint	randint()	randint()	
12	Python	Which of l linestyle	marker	lineheight	lineheight	
13	Python	What is a np.dim	np.dim()	np.ndim	np.ndim	
14	Python	Which of l plt.xlabel	plt.xlabel	plt.xlabel	plt.xlabel("Day")	
15	Python	Which of l line	scatter	pie	pie	
16	Python	Which of l dotted	dashdot	straight	straight	
17	Python	Which par slice	wedge	explode	explode	
18	Python	What is th A.astype()	A.astype()	A.astype()	A.astype(int)	
19	Python	A Series b	1	2	0	0
20	Python	What is th	2	1	0	1
21	Basic Matl	What is th	500	250	300	500
22	Basic Matl	What is th	5	1	10	5
23	Basic Matl	What is th	72	88	81	81
24	Basic Matl	What is th	9	12	10	10
25	Basic Matl	What is th	80	65	53	80
26	Basic Matl	What is th	250	200	150	250
27	Basic Matl	What is th	100	20	10	10
28	Basic Matl	What is th	2.6	16	8	8
29	Basic Matl	What is th	2.6	16	8	2.6
30	Basic Matl	What is th	9	12	10	12
31	Web Prog	Which of l <table>	<table>	<table>	<table>	<table>
32	Web Prog	Which of l <table>	<table>	<table>	<table>	<table>
33	Biology	What is th Mitochondrion	nucleus	plasma	Mitochondria	

Our excel file should look like this. There should be 7 columns and multiple rows of data.  
The first row is the header row, do not adjust anything in this row.

To make things more readable, select all columns from A - G column and under the “Home” tab, go to the right and find “Format”. Click on “Autofit Column Width”.

The rows now should be more readable and easier to access. Next, adding some questions. Simply go to the bottom row, and add new questions. Make sure the data added match the header row, such as type of questions, description, and choices of answers.

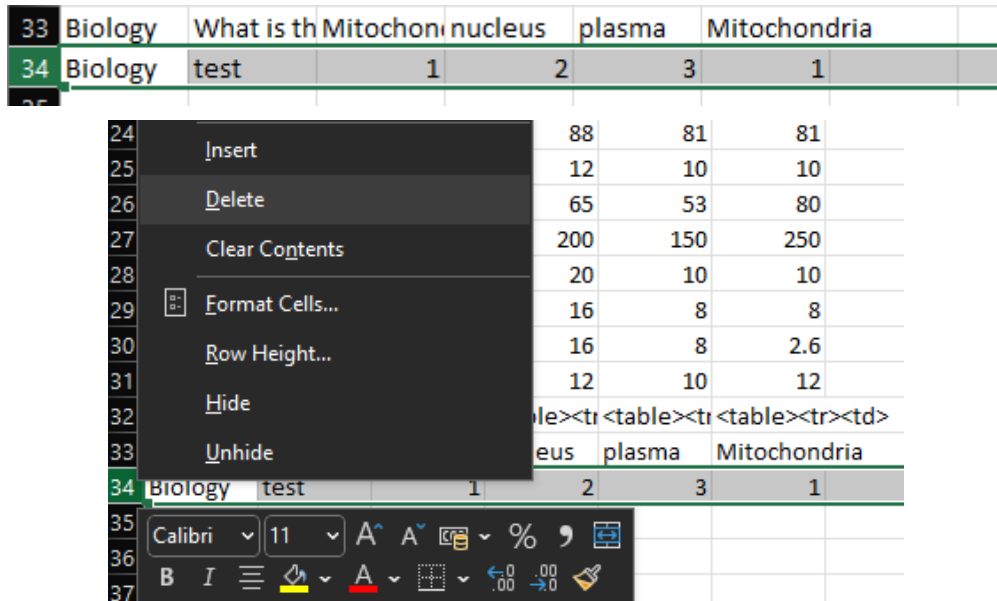

Upon finishing, make sure to save the file. Simply press “CTRL + S” or click on “File” > “Save”. With that, the process of adding new questions is done.

## Deleting Data

To delete data, select on the number of the row you want to delete. Right click on it and then click on “Delete”.

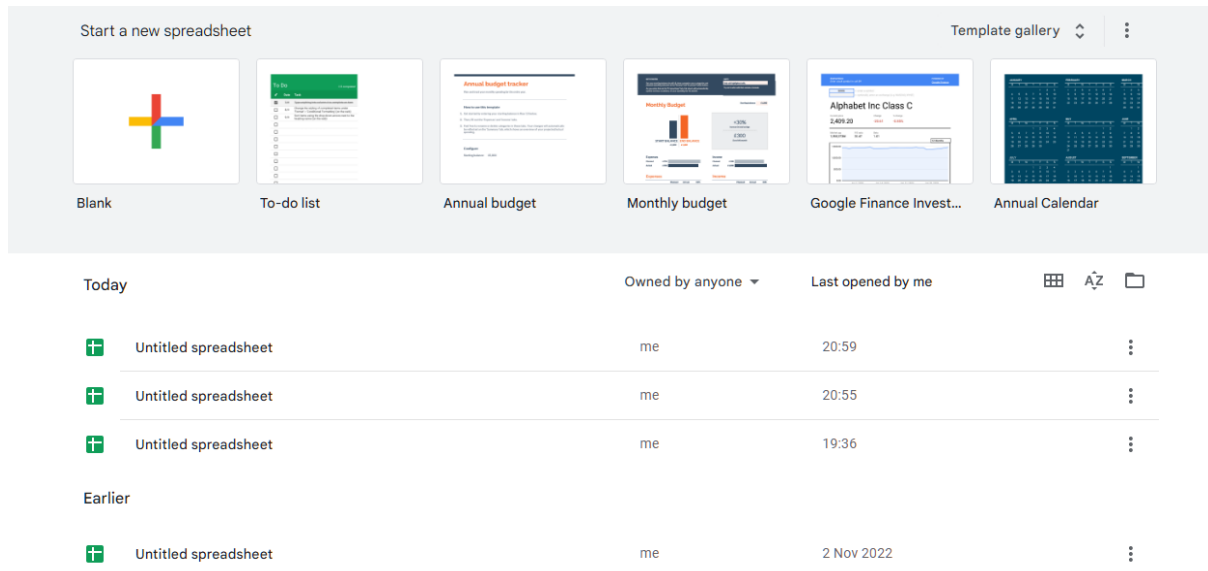

Upon finishing, make sure to save the file. Simply press “CTRL + S” or click on “File” > “Save”. With that, the process of adding new questions is done.

# Using Google Sheets

## Adding Data

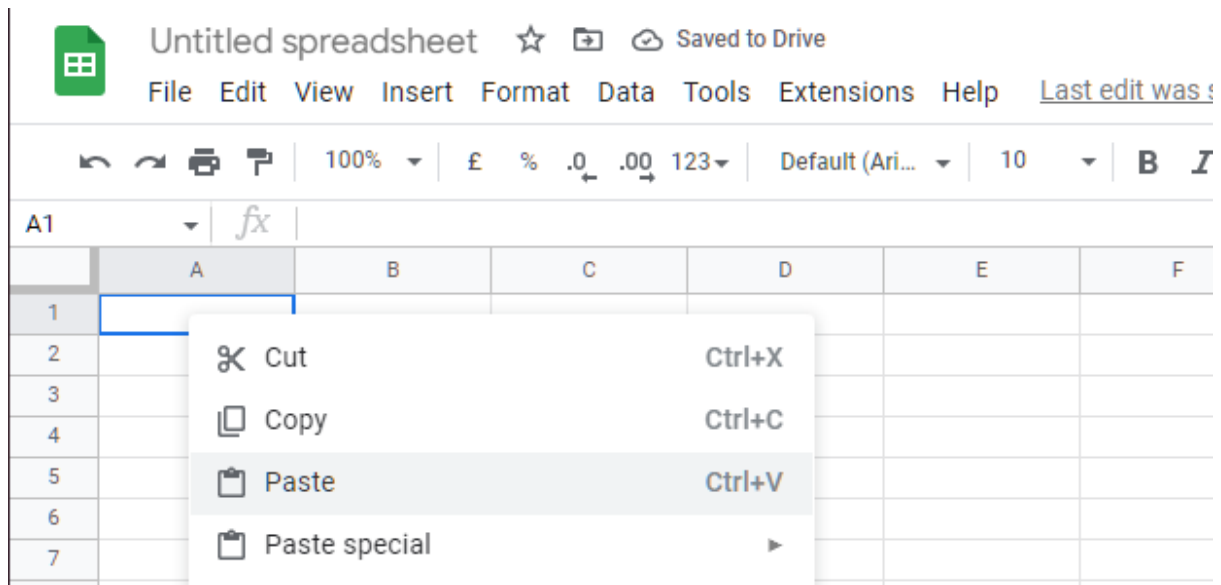

First, open google sheets using any browser, and click on “Blank”.

Find the file “StreamingAssets”, located under “Roundstars-Play > Roundstars\_Data”. There’s a few files but what we want to use is only “listofquestions(tsv).txt”. Open this file and press “CTRL + A” and “CTRL + C” to select and copy all data inside it.

Back to the google sheet browser, click on the first cell of the first row, and press “CTRL + V” to paste the data we just copied.

Generally our file will look like this.

	A	B	C	D	E	F	G	H	I	J	K	L
1	Type	Description	Choice 1	Choice 2	Choice 3	True Answer	LEAVE EMPTY					
2	Data Structures	What function is push_back()	append()	insert()	push_back()							
3	Data Structures	When a pop() or Overflow	Underflow	Syntax Error	Underflow							
4	Data Structures	Which of the foll Left -> Right -> F Right -> Left -> F Right -> Root -> Left -> Right -> Root										
5	Data Structures	Which data struc Queue	Stack	Array	Stack							
6	Data Structures	What will be the Bubble Sort	Merge Sort	Counting Sort	Counting Sort							
7	Data Structures	Which of the foll Bubble Sort	Selection Sort	Merge Sort	Merge Sort							
8	Data Structures	Which of the foll Merge Sort	Quick Sort	Selection Sort	Merge Sort							
9	Data Structures	Which of the foll Elements of mixi	Easier to access	Index of the first	Easier to access the elements in an array							
10	Data Structures	How are String r LinkedList of char	An array of char	The object of soi	An array of characters							
11	Data Structures	What is the mini	2	1	0	1						
12	Python	What function to rand()	randinteger()	randint()	randint()							
13	Python	Which of the foll linestyle	marker	lineheight	lineheight							
14	Python	What is a correc np dim	np.dim()	np.ndim	np.ndim							
15	Python	Which of the foll plt.xlabel("Day")	plt.xlabel = "Day"	plt.xlabel(Day)	plt.xlabel("Day")							
16	Python	Which of the foll line	scatter	pie	pie							
17	Python	Which of the foll dotted	dashdot	straight	straight							
18	Python	Which paramete slice	wedge	explode	explode							
19	Python	What is the corre A.astype(int)	A.astype('integer')	A.astype('T')	A.astype(int)							
20	Python	A Series by defa	1	2	0	0						
21	Python	What is the mini	2	1	0	1						
22	Basic Maths	What is the resu	500	250	300	500						
23	Basic Maths	What is the resu	5	1	10	5						
24	Basic Maths	What is the resu	72	88	81	81						
25	Basic Maths	What is the resu	9	12	10	10						
26	Basic Maths	What is the resu	80	65	53	80						
27	Basic Maths	What is the resu	250	200	150	250						
28	Basic Maths	What is the resu	100	20	10	10						
29	Basic Maths	What is the resu	2.6	16	8	8						
30	Basic Maths	What is the resu	2.6	16	8	2.6						
31	Basic Maths	What is the resu	9	12	10	12						
32	Web Programmi	Which of these ti	<table><tr><td>	<table><tr><td>	<table><tr><td>	<table><tr><td>						
33	Biology	What is the powi Mitochondria	nucleus	plasma	Mitochondria							
34	Biology	test	1	2	3	1						
35												

To add new questions, simply go to the bottom row, and then input new data. When finished, select all data using "CTRL + A" and copy them using "CTRL + C". Go back to the txt file we opened earlier(listofquestions(tsv).txt), and replace the data inside it using "CTRL + A" and "CTRL + V". Save the file and the process should be finished.

# Header Explanation

## 1. Type

- a. Determines the group the question will be in. You can insert the subject of the question here, E.G : Chemistry, Biology.

## 2. Description

- a. Description of the question. Displayed to the user, make sure to describe the question properly so that the player can understand it and know how to answer it.

## 3. Choice 1 - 3

- a. Answer choices that the user will see. Make sure they are all different. Don't worry about arrangement as they will be randomised in the game.

## 4. True Answer

- a. The correct answer to the questions. Make sure this exists in one of the choices of answer. Hidden from players.

## 5. Leave Empty

- a. As the name suggests, leave this cell empty.

# Rules of Adding New Questions

Please follow these rules when adding new questions into the excel file, due to how Roundstars reads the excel file and convert them into objects in the game, some rules must be made so that all input are properly translated and works as intended.

**1. When entering data, make sure no “tab” key is entered.**

- a. Because we are using a “TSV” (tab separated values) file, each cell in the excel file is separated by a “tab”. That’s how excel knows how to separate each data and assign them into their own individual cells. This also applies to Roundstars. Roundstars uses “tab” to read and separate each data, this way it’s easy to determine the row,column of each data. If we enter “tab” into one of the data, all the order of the cells will be scattered and unity will read them wrongly thus translate them into the wrong object. Make sure to double check data inserted.

**2. When entering data that has the same type, make sure they are exactly the same.**

- a. E.G : when creating new questions with the subject “Chemistry”, we would enter “Chemistry” into the “Type” row. For precautions, make sure questions with the same subjects have the exact spelling. Roundstars categorise each question using their “Type”. Questions with the same “Type” will be in the same group.

**3. When entering “True Answer”, make sure they also exist in one of the answer choices.**

- a. “True Answer” is what determines the correct answer to the question. Meanwhile “Choice 1” to “Choice 3” is what will be displayed to players as answer selection. Make sure “True Answer” exists in one of these choices. Don’t worry about the arrangement of the answer choices as they will be randomised in the game.

**4. When entering new data, make sure the last column is emptied.**

- a. In excel, the last cell of every row will automatically be added a “next line”. This will mess up the column “True Answer”. To prevent this, a column “Leave Empty” is added to make sure data inserted is not tampered with. Thus, make sure this column is empty every time you enter a new data.

**5. When playing the game, make sure to close the excel/txt file you use to edit.**

- a. Make sure you save any changes you made to the file, and make sure it’s closed before you play the game or else Roundstars won’t be able to read it.
